

INFORMATION ASSURANCE & CYBER SECURITY | SECURITY INTEGRATION | CUSTOM WEB BASED SOLUTIONS | TECHNOLOGY

The SecureState Way

SecureState’s approach involves providing clients with the “Best Value” security practices. SecureState is devoted to building and maintaining strong business relationships with its diverse client base as a trusted security advisor.

When you work with SecureState, you are engaging with individuals who are dedicated to offering the best security solutions for your organization.

The SecureState team provides solutions in the following four specialties:

- Information Assurance (IA) & Cyber Security
- Security Integration
- Custom Web Based Solutions
- Technology

Whether you are working toward regulatory compliance, desire to build or enhance a solid security program, require security testing, or have experienced a data breach, SecureState has the expert team you need.

Three States of Security

SecureState’s name originated from the understanding that there are three distinct states of security:

- The Current State
- The Desired State
- The Secure State

When working with SecureState, clients gain the understanding and ability to build and maintain a Secure State.

CERTIFIED SMALL BUSINESS

TOP SECRET FACILITY CLEARANCE

CLEARED PERSONNEL

INC 500/5000 is an annual ranking of the fast-growing private companies in America. Ranking is based on percentage growth in company net sales over a five-year period.

The Weatherhead 100 showcases the fastest growing companies in Northeast Ohio. Qualifying companies must show consistent growth over the last five years.

HONORING 99 GREAT WORKPLACES FOR TOP TALENT IN NORTHEAST OHIO

Specialties in Detail:

IA & Cyber Security: Consulting

IA & Cyber Security Consulting Services are at the core of SecureState's capabilities. Through our work in both the public and private sectors, we have developed a diverse suite of offerings. Our partnership approach has benefited our clients during Audits for FISMA, counter intelligence support, and advisory services.

Security Integration

Properly integrating security solutions within your environment can be more important than the solution itself. Many organizations can have the top of the line product, but if the configurations aren't properly set, the product could be rendered useless. Our team of integration professionals hold top industry certifications including CCISP, CCIE and CCDP.

IA & Cyber Security: Assessments

Assessments are one of the most important aspects of a security program. Without assessments, entities struggle to place the correct controls in the correct areas to secure their organizations. SecureState's assessment services allow your organization to understand the areas in which your organization is most vulnerable to attack and provide remediation steps for your organization to become secure.

Custom Web Based Solutions

The ability for an organization to remain updated on what is critical to maintain a strong security program can be very demanding and require a large team of individuals. SecureState's web based solutions help automate activities to help organizations manage and track their security program more efficiently.

IA & Cyber Security: Architecture

The importance of a strong security architecture goes beyond managing and mitigating vulnerabilities to getting your organization's overall security program to a managed state. Whether complying with regulations or responding to incidents, SecureState's architecture services serve as a critical portion of your security program.

Technology

In addition to our core capabilities, SecureState has a team of highly trained and certified technology professionals. SecureState can assist your organization in a variety of activities and, with the assistance of our IA & cyber security team, ensure that your organization's processes and products are developed and implemented in a secure fashion.

- 561611: Investigation Services
- 561612: Security Guards and Patrol
- 561621: Security Systems Services

Experience the Difference with the SecureState Team

SecureState is ranked #21 on the Inc. 5000 list of America's top security companies.

As a certified small business, SecureState has worked with a variety of government entities since its inception in 2001. That experience, combined with our work in the private sector in such industries as Financial, Retail, Utilities, and Healthcare, has provided SecureState with the unique ability to leverage the best of breed practices from both sectors.

SecureState's sole focus is on information security, from consulting services and assessments (penetration testing) to integration, technology, and security development services. SecureState also has more than 50 W-2 employees, many with Top Secret Clearances, on the bench at any one time, which provides the flexibility to react quickly to task order engagements.
